

Perimeter

- total distance around a polygon;
- add all sides together to get Perimeter

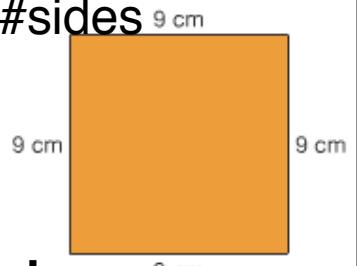

$$\text{Perimeter} = 38 + 31 + 62 + 9 + 27 + 15 \\ = 182$$

The perimeter of this hexagon is 182 mm.

Perimeter of regular polygons

1. Square: $P = L \times \# \text{ sides}$

$$P = L \times 4 \\ = 9 \times 4$$

Legend

L = length W = Width S = Sides

2. Parallelogram: $P = 2 \times (L + w)$ or
 $P = 2 \times L + 2 \times W$

$$P = 2 \times (L + W) \\ = 2 \times (11 + 6) \\ = 2 \times 17 \\ = 34 \text{ cm}$$
